EMTs and Beyond

EMT's are most commonly used at events. Most have many limitations that make the difference in providing the best care to the patient or rapid intervention. MedStar EMT capabilities go above and beyond most others.

We also offer more Advaced Levels of Care

PARAMEDICS

ALS Level of Care
Cardiac Drugs
Advanced Respiratory Care
Additional ALS Drugs

ER PHYSICIANS

On-Site Medical Control
Expanded Protocol Options
Evaluations and Assessments

MEDICAL DIRECTOR

MedStar is able to do more advanced care at the EMT level due to the progressiveness of our medical director, internal training, and outstanding leadership.

CLIENT COMMENTS

There are many differences in EMTs and how they perform their job. Below are some significant compliments that we have received from clients, Fire, Police, Conventions Centers, Music Venues, and Endurance Sports Clients

Your team is always out and about giving our attendees piece of mind.

How do you get to our patients so quickly? We didn't event know there was a medical call.

It is amazing how you can give such in-depth care to our guests, so well, and get them back to enjoy the event.

Medical teams before have been reactive, your model is obvious that you are constantly proactive.

I am impressed that your EMTs can do so much more than any others I have worked with at other events and venues.

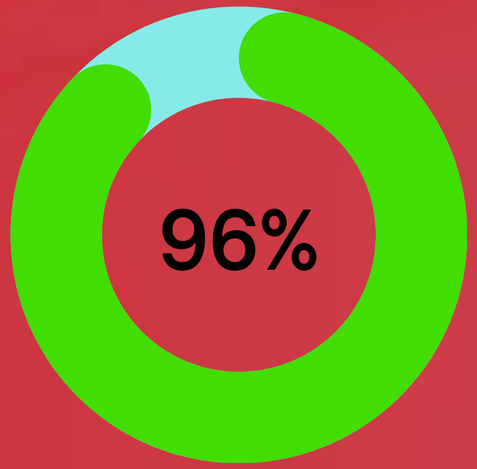
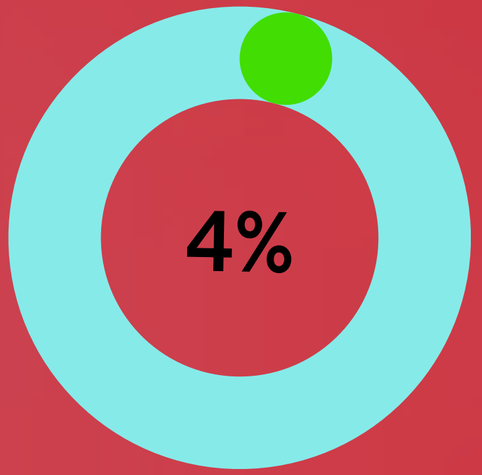
On-Site Care -vs- Transport

MedStar Providers give a higher level of care so your attendees and staff can get back to the event



Patients treated on-site by MedStar Providers with no additional care required.



Ambulance Transports due to advanced care, diagnostics, or critical care situations.

The MedStar Difference

Our team is trained specifically in Event Medical Services. This is a trifecta approach combining EMS/911 Providers, Emergency Room Technicians, and Wound Care Specialists. These modalities allow us to not only stabilize a patient to go to a hospital but to give the best level of care, on-site, to avoid costly medical bills.
